CONTENTS

Relations of Micronutrients to Development of Microorganisms. Robert L. Starkey. 1
Effects of Excessive Cultivation and Puddling on Conditioner-Treated Soils in the Laboratory. C. L. W. Swanson, R. M. Hanna, and H. C. deRoo. 15
Effect of Field Applications of Synthetic Soil-Aggregate Stabilizers on Plant Emergence. Jack D. DeMent, W. P. Martin, George S. Taylor, and E. K. Alban. 25
Chemical Changes in Sewage During Reclamation by Spreading. Arnold E. Greenberg and P. H. McGauhey. 33
Ion Exchange in Soil Columns. John M. Rible and Lannes E. Davis. 41
A New Method of Evaluating Porosity and Slip-Corrected Permeability. J. S. Aronofsky, N. Stein, and G. C. Wallick. 49
Distribution of Heavy Minerals and Soil Development in Scott Silt Loam. John E. Adams and R. P. Matelski. 59
Adsorption of Water Vapor: III. Homoionic Montmorillonites at 25°C. H. D. Orchiston. 71
Books. 79
Lysimeters for Studying Effects of Salinity, Leaching, and Position of Water Table on Plant Growth. L. E. Allison and R. C. Reeve. 81
Infiltration and Soil Water Movement During Irrigation. Vaughn E. Hansen. 93
Basic Problems in Organic Matter Transformations. F. E. Broadbent. 107
The Role of Solid Phase in the Phosphorus Nutrition of Plants. M. A. Islam. 115
Meaning of the Great German Soil Fertility Survey. O. W. Willcox. 123
Effect of Aqueous Solutions of Soil Conditioner Chemicals on Corn Seedlings Grown in Nutrient Solutions. C. L. W. Swanson and H. G. M. Jacobson. 133
Clay Minerals of South African Soil Groups: II. Subtropical Black Clays and Related Soils. C. R. van der Merwe and H. Heystek. 147
Kinetics of Ion Exchange Between Two Adsorbents: II. Equal Valency Ion Pairs. C. Krishnamoorthy and A. D. Desai. 159
Iron Nutrition of Plants at High pH. P. C. de Kock. 167
Movement of Iron in the Development of Loess-Derived Brunizem Soils. Richard M. Swenson and F. F. Riecken. 177
A Rapid Manometric Method for Determining Soil Carbonate. A. E. Martin and R. Reeve. 187
Acidoid Value and Surface Area of Soil Separates. Balwant Rai Puri, Jagjit Singh, and Lekh Raj Sharma. 199
Organic Phosphorus in New Zealand Soils Under Pasture: I. Conversion of Applied Phosphorus Into Organic Forms. R. H. Jackman. 207
Kinetics of Ion Exchange Between Two Adsorbents: III. Hydrogen and Hydroxyl Systems. C. Krishnamoorthy and A. D. Desai. 215
Adsorption of Water Vapor: IV. Characterization of Expanding Lattice Minerals at 25°C. H. D. Orchiston. 221
Books. 225
Note. 237
The Age and Channeling of Ceylon Laterite. J. G. Vermaat and C. F. Bently. 239
Air and Vapor Movement in Soil Due to Wind Gustiness. Hitoshi Fukuda. 249
Relation of Temperature to Moisture Tension of Soil. Robert Gardner. 257
Ion Adsorption by Clays. G. H. Bolt. 267
Organic Matter and Total Nitrogen in Southern California Orange Orchard and Adjacent Virgin Soils. Robert B. Harding. 277
Theoretical Aspects of the Soil-Conditioning Activity of Polymers. R. S. Montgomery and B. B. Hibbard. 283

Organic Phosphorus in New Zealand Soils Under Pasture: II. Relation Between Organic Phosphorus Content and Some Soil Characteristics. R. H. JACKMAN 293
Soils of the Palouse Loess: II. Development of the A_2 Horizon. SAMUEL RIEGER AND HENRY W. SMITH 301
Books 321
Note 327
Albert Demolon 1881–1954 (Obituary) 329
Nitrogen Adsorption Experiments on Several Clay Minerals. C. S. BROOKS 331
Clay Minerals of Some Well-Drained Volcanic Ash Soils in Japan. SHIGENORI AOMINE AND NAGANORI YOSHINAGA 349
Response of Longleaf Pine Seedlings to Soils and Fertilizers. R. M. ALLEN AND T. E. MAKI 359
Effects of Phosphorus and Copper Salts on Iron Chlorosis of Rice in Flooded and Nonflooded Soil and the Associated Enzymatic Activity. J. C. BROWN, R. S. HOLMES, R. E. SHAPIRO, AND A. W. SPECHT 363
Interrelation of Carbon Dioxide and Bicarbonate Ions in Causing Plant Chlorosis. LYNN K. PORTER AND D. W. THORNE 373
Principle of the Platinum Microelectrode as a Method of Characterizing Soil Aeration. E. R. LEMON AND A. E. ERICKSON 383
Porosity Changes and pF-Water Relation in Heated Soils. K. SUBBA RAO and P. T. RAMACHARLU 393
Books 407
Note 411
Common Ion Effect on Phosphate Solubility. J. A. KITTRICK AND M. L. JACKSON 415
A Portable Vacuum Filter. L. A. RICHARDS 423
Effect of Soil Acidification on Vegetative Growth and Leaf Composition of Lemon Trees in Pot Cultures. D. G. ALDRICH, J. R. BUCHANAN, AND G. R. BRADFORD 427
Differential in Potential Production and in Utilization of Nitrogen and Potassium by Calcium-Accumulating and Silicon-Accumulating Crop Plants. H. P. COOPER AND E. E. HALL 441
Use of Ethylenediaminetetraacetic Acid in Soil Analysis: I. Experimental. P. J. VIRO 459
Agrobiologic Percentage Method of Evaluating Fertilizer Tests: I. Potash and Tobacco. O. W. WILLCOX 467
Utilization by Plants of Phosphorus in Farm Manure: III. Uptake of Phosphorus by Sudan Grass from Manure and Superphosphate Incorporated into Soil at Different Depths. CLAYTON MCAULIFFE AND RICHARD BRADFIELD 475
Books 487
Index 491

SUBJECT INDEX

Acidification, effect on—
exchangeable bases, 435.
growth, 430.
leaf composition, 433.
Acidoid—
influence of gradual drying, 203.
relation to surface area, 204.
value of soil separates, 199.
Adsorption—
ions by clays, 267.
isotherms, 72, 341.
nitrogen, 333.
water vapor by—
clay minerals, 221.
homoionic montmorillonites, 71.
Aggregates—
analysis, conditioned soils, 16, 26, 284.
comparison of dry- and wet-sieving, 20.
relation to soil-conditioning activity, 285.
Area—
by nitrogen adsorption, 339.
calculation of surface, 200.
surface of soil separates, 199.
Ascorbic acid oxidase, 365.
Books, *see* end of letter B.
Boron and microorganisms, 8.

BOOKS

Advances in Agronomy, 225.
Agricultural Process Engineering, 321.
Agricultural Resources of the World, 225.
Agronomy, Advances in, 225.

Wraight, A. J. Field Study of Place, 228.
Wright, T. *See* Kilman, E.
Yearbook of Food and Agriculture Statistics, 490.
Zweig, G. *See* Block, R. J.

Calcium-accumulating plants, 443.
Carbon dioxide-bicarbonate, effects on plants, 374.
Carbonates—
  comparison between titrometric and manometric methods, 190.
  effects of various materials, 193.
  recovery of added, 191.
  soil, method for determining, 187.
Catalase—
  activity of rice, 365.
  effect of copper, 369.
Cation exchange—
  capacity of volcanic soils, 354.
  properties of organic matter, 111.
Chelates, use of EDTA for exchangeable bases, 459.
Chlorophyll—
  contents of plants, 375.
  influence of carbon dioxide levels, 377.
Chlorosis—
  causes, 373.
  of rice, 363.
Chromatograms—
  calcium-sodium, 45.
  sodium-calcium, 45.
Clays—
  ion adsorption, 267.
  minerals of volcanic ash soils of Japan, 349.
  nitrogen adsorption by, 331.
  of South African soils, 147.
  phosphate solubility, 417.
  thermal curves, 351.
  water adsorption by montmorillonite, 71.
  water vapor by expanding lattice, 221.
Cobalt and microorganisms, 9.
Conditioners—
  as affected by excess cultivation, 15.
  concentration, effects on plant emergence, 30.
  effect on—
    plant growth, 135.
    soil structure, 22.
  in nutrient solutions, 133.
  influence of molecular weights, 287.
  polymer bond, 291.
  theoretical aspects of activity, 283.
  toxic effects, 136.
Copper—
  and iron chlorosis, 363.
  effect on microorganisms, 4.
  sulfate, effect on phosphorus absorption of rice, 366.
Cultivation, effect on aggregates, 18.
Demolon, Albert, obituary, 329.
Enzymes—
  activity of rice, 363.
  and micronutrients, 9.
  metal contents of, 10.
Exchange—
  acidification and, bases, 435.
  equilibrium between sodium-calcium illite systems, 273.
Flooding, effect on enzymatic activity of rice, 365.
Growth responses of calcium- and silicon-accumulating plants, 441.
Heavy minerals—
  and soil development, 59.
  distribution, 62.
  identification, 61.
  in soils of Palouse loess, 311.
  separation, 61.
Ion—
  adsorption by clays, 267.
  hydrations, 75.
Ion exchange—
  adsorbents, 162.
  anion exchangers, 219.
  basic theory of, 42.
  hydrogen systems, 217.

Ion exchange—(*continued*)
kintetics of, 159, 215.
monovalent and divalent cation pairs, 161.
soil columns, 41.
Iron—
absorption by rice, 369.
bicarbonate-ion effects, 376.
chlorosis of rice, 363.
distribution of total, in soils, 179.
effect of aeration on, 170.
forms of, 170.
free, 177.
"lattice," in soils, 181.
microorganisms, 3.
movement in loess soils, 177.
nutrition of plants at high pH, 167.
transformations, 3.
Irrigation—
lysimeters for study, 81.
water movement, 93.
Laterite—
Ceylon, age and channeling of, 239.
occurrence, 240.
origin, 244.
Lemon trees, effect of soil acidification, 427.
Lysimeters—
design, 81.
water control in, 84.
Manganese, effect on microorganisms, 5.
Methods—
carbonate, 187.
soil aeration, 383.
soil porosity, 49.
Micronutrients—
and microorganisms, 1.
composition of lemon leaves, 434.
in enzymes, 9.
Microorganisms, effect of micronutrients, 1.
Mitscherlich-Baule equations, application to plant yields, 450, 467.
Moisture tension, effect of temperature, 261.
Nitrogen—
adsorption by clays, 331.
contents of—
citrus soils, 277.
virgin soils, 279.
isotherms, 341.
organic, 109.
surface area, 337.
Organic matter—
cation exchange of, 111.
contents of—
citrus soils, 277.
Palouse soils, 308.
virgin soils, 279.
effects of various treatments on, 281.
nitrogen fraction, 109.
properties of, 108.
separation, 107.
transformations, 107.
variability, 107.
Oxygen, dissolved, at various soil depths, 36.
Palouse loess, soils of, 302.
Percentage method, agribiologic, for evaluating fertilizer tests, 467.
Permeability—
air, 252.
method for, 49.
technique, 395.
pF—
significance of, 403.
water relation in heated soils, 393.
Phosphorus—
absorption by rice, as affected by copper sulfate, 366.
content of plants, 117, 476.
fertilizer in grass, 479.
inorganic, 297.
nutrition, role of solid phase in, 115.
organic, in soils, 207, 293, 354.
plant use of, in manure, 475.
precipitated, 416.
retention by soils, 354.
solubility, common ion effect, 415.
utilization from various soil depths, 483.
Pine seedlings, response to soils and fertilizers, 359.
Plant emergence—
and soil conditioners, 25.
various crops, 28.
Pore volume—
capillary, 394.
changes, 397.
noncapillary, 395.
Porosity—
changes in heated soils, 393.
method for, 49.
Pressure, depth of air, changes in soils, 253.
Radioisotopes—
Fe55, 364.
P32, 364.
Rice, iron chlorosis of, 363.
Separates, soil, preparation of, 199.
Sewage—
chemical changes in, 33.
composition of percolating liquids, 34.

Silicon—
accumulating plants, 443.
passive role in plants, 447.
Soil development, heavy minerals, 59.
Soil fertility survey, significance of German, 123.
Soil series, analyses, descriptions of, or experiments with—
Aiken, 116; Blacklock, 460; Brookston, 386; Canfield, 475; Cheshire, 15; Dunkirk, 113; Edina, 173; Erie, 475; Goldridge, 460; Greenfield, 278; Hanford, 33, 278; Honeoye, 113; Larkin, 307; Miami, 26, 419; Minden, 177; Nez Perce, 308; Norfolk, 359; Omega, 417; Ontario, 113, 475; Orangeburg, 359, 460; Pachappa, 87; Palouse, 307; Porterfield, 278; Ramona, 428; San Joaquin, 278; Santa, 309; Scott, 59; Sierra, 460; Sorrento, 119; Southwick, 309; Thatuna, 308; Vista, 278; Wooster, 475; Yolo, 44, 278, 428.
Standard yield diagrams, significance of, 469.
Structure, effect of cultivation, 22.
Temperature—
and moisture tension of soils, 261.
warming curves, 262.
Thermal—
analysis, 147.
curves, 153, 156, 351.
Vacuum filter, portable, description of, 423.
Water—
adsorption by montmorillonite, 71.
control in lysimeters, 84.
molecular layers, 73.
movement—
during irrigation, 93.
theory of, 98.
table measurements, 88.
Wind, effect on air and vapor movement in soil, 249.
X-ray diffraction—
South African soils, 150, 154, 156.
spectra of bentonites, 337.
volcanic soils, 353.
Zinc, effect on microorganisms, 7.

CONTENTS

Soil and Fertility Effects on Clover Yield. Bessel D. van't Woudt 1
Adsorption of Ammonia by Clays and Muck. M. M. Mortland 11
Acidic Properties of Clay Minerals. J. Rex Goates and Kenneth H. Anderson 19
Reddish Brown Lateritic Soils of the North Carolina Piedmont Region: Davidson and Hiwassee Series. M. A. Nyun and S. B. McCaleb 27
Role of Surface Phenomena in Nitrification. Sheldon S. Goldberg and P. L. Gainey 43
Portable Conductivity Bridge and Cells for Salinity Appraisal. L. A. Richards 55
Rates of Evaporation from Wet and Dry Soils and Their Significance. F. J. Veihmeyer and A. H. Hendrickson 61
Use of Ethylenediaminetetraacetic Acid in Soil Analysis: II. Determination of Soil Fertility. P. J. Viro 69
Agrobiologic Percentage Method of Evaluating Fertilizer Tests: II. Phosphate and Oats; Mixed Fertilizer and Potatoes. O. W. Willcox 75
Books 85
Relative Uptake of Adsorbed Monovalent and Divalent Cations by Excised Barley Roots as Influenced by the Exchange Capacity. L. Wiklander and M. M. Elgabaly 91
Effect of Osmotic Pressure on Diffusion Rate of Water. Philip F. Low 95
Comparisons of Five Chelating Agents in Soils, in Nutrient Solutions, and in Plant Responses. A. Wallace, R. T. Mueller, O. R. Lunt, R. T. Ashcroft, and L. M. Shannon 101
Products of Clay Mineral Decomposition as Related to Phosphate Fixation. Alfred T. Perkins, R. Dean Dragsdorf, E. R. Lippincott, Jack Selby, and W. G. Fateley 109
Influence of Light on Interaction of Ammonium and Nitrite Ions. A. Wahhab and Fazal Uddin 121
Effect of Long-Time Dryland Cropping on Available Phosphorus of Cheyenne Fine Sandy Loam. D. L. Grunes, H. J. Haas, and S. H. Shih 127
Soils of the Nanakhi Series, East Pakistan: I. Morphology, Textural Separates, and Exchangeable Cations. A. Karim and D. H. Khan 139
Qualitative Studies of Soil Microorganisms: XIII. Effect of Decomposition of Various Crop Plants on the Nutritional Groups of Soil Bacteria. J. W. Rouatt and A. G. Lochhead 147
Factors That Influence Clod Structure and Erodibility of Soil by Wind: IV. Sand, Silt, and Clay. W. S. Chepil 155
Books 163
Chelates as Correctives for Chlorosis. R. S. Holmes and J. C. Brown 167
Estimation of Amino Acids in Soil Hydrolyzates by the Moore and Stein Method. F. J. Sowden 181
Soil Fertility: A Watershed Management Problem in the San Gabriel Mountains of Southern California. Henry Hellmers, James F. Bonner, and John M. Kelleher 189
Potassium Availability from Biotite, Muscovite, Greensand, and Microcline as Determined by Growth of *Aspergillus niger*. Charles F. Eno and Herbert W. Reuszer 199
Nutrient Element Content of Native Forages in Relation to Location and Land Forms in the South Carolina Coastal Plain. Kenneth C. Beeson 211
Source and Characteristics of Mineral Materials from Which South Carolina Coastal Plain Marine Terrace Soils Are Derived. H. P. Cooper 221
Relationship Between pH and Different Forms of Phosphorus in Some Soils of East Pakistan. A. Karim and D. H. Khan 229
Specific Effects of Adsorbed Ions on Plant Growth: I. Effect of Different Combinations of Calcium, Magnesium, and Sodium on Barley Seedlings. M. M. Elgabaly 235

Books ... 249
Notes ... 253
Charles Ernest Millar 1885–1955 ... 255
Thermodynamics of Soil Moisture: A New Application. K. L. Babcock and Roy Overstreet ... 257
Arctic Brown Soil. J. C. F. Tedrow and D. E. Hill ... 265
Titania Content of Some Gray-Brown Podzolic Soils of East Pakistan. A. Karim and D. H. Khan ... 277
Early Fruiting and Boll Maturity of Cotton as Affected by Sodium and Root Aeration. Frank L. Selman and R. D. Rouse ... 281
Distribution of Potassium, Rubidium, Cesium, Calcium, and Strontium Within Plants Grown in Nutrient Solutions. R. G. Menzel and W. R. Heald ... 287
Gliotoxin in Soils. Elfed Evans and David Gottlieb ... 295
Influence of Soil Profile Characteristics and Nutrient Concentrations on Fungi and Bacteria in Leon Fine Sand. Wm. G. Blue, C. F. Eno, and P. J. Westgate ... 303
Relative Distribution of Potassium and Rubidium 86 Within Corn Plants Grown in the Field. W. Z. Mackie and Maurice Fried ... 309
Effects of Low Temperatures on Nitrification of Ammonia in Soils. O. E. Anderson and E. R. Purvis ... 313
Specificity of Voltage Potentials in Cation Uptake by Plants. E. L. Breazeale and W. T. McGeorge ... 319
Kinetics of Exchange Between Adsorbents: IV. Unequal Valency Ion Pairs. C. Krishnamoorthy and A. D. Desai ... 325
Books ... 335
Use of Piperidine Saturation in the Identification of Clay Minerals by Differential Thermal Analysis. A. R. Carthew ... 337
A Comparison of Leaching and Distillation Procedures for Determining Fixed Ammonium in Soils. F. E. Allison and E. M. Roller ... 349
Effect of Puddling on Water Stability and Bulk Density of Aggregates of Certain Maryland Soils. B. F. Beacher and Edward Strickling ... 363
Relation Between Electrical Conductance and Cation Uptake by Tomato Plants. E. L. Breazeale and W. T. McGeorge ... 375
Acid- and Alkali-Soluble Phosphorus in Relation to Soil Reaction. P. F. Pratt and H. E. Shoemaker ... 381
A Portable Capacitance-Type Soil Moisture Meter. C. V. de Plater ... 391
Flood-Fallowing for Eradication of *Fusarium oxysporum* F. *cubense:* III. Effect of Oxygen on Fungus Survival. R. H. Stover ... 397
Factors That Influence Clod Structure and Erodibility of Soil by Wind: V. Organic Matter at Various Stages of Decomposition. W. S. Chepil ... 413
Significance of Surface Areas Calculated from Water Vapor Sorption Isotherms by Use of the B.E.T. Equation. J. P. Quirk ... 423
Fixation and Release of Ammonium Ions by Clay Minerals. F. E. Allison and E. M. Roller ... 431
Effect of Salinity on the Wilting Percentage of Soil. E. L. Breazeale and W. T. McGeorge ... 443
Relationship of Porosity to Water Stability in Beltsville Soil Aggregates. Edward Strickling ... 449
Root-Knot Nematode Infestation as Influenced by Soil Texture. Bailey Sleeth and Harold W. Reynolds ... 459
The Italian Soil Conditioner "Flotal." J. M. Kalovoulos ... 463
Effect of Liming on Aggregation, Noncapillary Pore Space, and Permeability of a Lateritic Soil. M. O. Ghani, K. A. Hasan, and M. F. A. Khan ... 469
Clay Minerals of South African Soil Groups: III. Soils of the Desert and Adjoining Semi-arid Regions. C. R. van der Merwe and H. Heystek ... 479
Index ... 495

SUBJECT INDEX

Acids, amino, in soil hydrolyzates, 181.
Aggregates, soil:
  liming, effect on formation of, 469.
  porosity and water stability relationship in, 449.
Alfalfa:
  as a cover crop, 148, 413.
  vitamin B_{12} relationship to, 152.
Aluminum, liberation of, influence on phosphate fixation, 109.
Ammonia:
  adsorption by clays and muck, 11.
  fixed ammonium in soils, determination of, 349.
  nitrification of, effect of low temperature on, 313.
Ammonium ions:
  fixation and release, in clay minerals, 431.
  influence of light on interaction with nitrate ions, 121.
Antibiotics. *See* Gliotoxin.
Aromatic amine (138), as a chelating agent, 101.
Aspergillus niger technique for determining potassium in soils, 199.
Attapulgite, fixation and release of NH_4^+ by, 431.
Bacteria, soil:
  availability of fixed NH_4^+ to, 439.
  effect of plant decomposition on nutritional groups of, 147.
Barley:
  effects of:
    adsorbed ions on growth, 235.
    cropping on yield and phosphorus content, 133.
  uptake of adsorbed cations by excised roots, 91.
B. E. T. equation, use in comparison of surface areas, 423.
Bean plants, Fe content of leaves, stems, and pods, 106, 107.
Bentonite, adsorption of ammonia, 11.
Biotite, release of potassium from, 199.
Book reviews, 85, 163, 249, 335.
Buckwheat plants grown in nutrient solutions, distribution of some elements in, 288.
Calcium:
  determination of:
    in Finnish soils, 72.
    in South Carolina coastal plain, 211, 223, 226.
  distribution within plants grown in nutrient solutions, 287.
  effect on barley seedlings, 235.
  in Leon fine sand profile, 305.
  specificity of voltage potentials in uptake by tomato plants, 319.
Capacitance soil-moisture meter, description of, 391.
Cation uptake:
  and voltage potentials, 319.
  by excised barley roots, 91.
  by tomato plants, relation between electrical conductance and, 375.
Cations, exchangeable:
  estimating exchange capacity of clays, 346.
  in Nanakhi soil profiles, 144.
CDTA, as a chelating agent, 101.
Celery, Pascal, a fertility experiment, 303.
Cesium, distribution within plants grown in nutrient solutions, 287.
Chelating agents:
  as correctives for chlorosis, 101, 167.
  fixation in soil, 104.
Chlorosis, chelates as correctives for, 101, 167.
Clays:
  adsorption of ammonia, 11.
  cation exchange capacity, estimation of, 346.
  erodibility by wind, 155.
  evaporation from, 63.
  fixation and release of ammonium ions, 431.
  mineral decomposition and phosphate fixation, 109.
  mineralogy of:
    Arctic brown soil, 265.
    North Carolina lateritic soils, 31.
    So. African desert soils, 479.
  surface areas, compared with soil colloids, 423.
  use of piperidine in identification of minerals by thermal analysis, 337.
Clover:
  effect of:
    red clover on incidence of nutritional soil bacteria, 148.
    soil moisture and fertility on yield, 1.
  distribution of some elements within plants grown in nutrient solutions, 288.
  phosphorus content of, 5.

Cobalt, in South Carolina coastal plain, 211, 225.
Colloids, soil, surface areas compared with clays, 423.
Copper:
in Finnish soils, 70.
in South Carolina coastal plain, 211, 225, 226.
Corn plants, distribution of potassium and rubidium in, 309.
Cotton plants, effect of sodium and root aeration on characteristics of, 281.
Cowpeas, distribution of some elements within plants grown in nutrient solutions, 288.
Cropping. *See* Dryland cropping.
Cyclohexane-1,2-diaminatetraacetic acid. *See* CDTA.
Dextrose in water, effect on fungus survival, 411.
Diethylethylenetriaminepentaacetic acid. *See* DTPA.
Drainage basins, South Carolina coastal plain, characteristics of, 226.
Dryland cropping, effect on available phosphorus, 127.
DTPA, as a chelating agent, 101.
EDTA, use of:
as a chelating agent, 101.
in soil analyses, 69.
Equilibria, adsorbent-adsorbent, kinetics of exchange between adsorbents, 325.
Erosion, soil:
factors influencing wind erodibility, 155.
influence of decomposed organic matter, 413.
reduction by increased soil fertility, 189.
Ethyl-acetate-chloroform technique for extracting gliotoxin from soils, 297.
Ethylene glycol, retention as a measure of surface areas of clays, 428.
Ethylenediaminetetraacetic acid. *See* EDTA.
Evaporation. *See* Moisture, soil.
Fertility, soil:
as a watershed problem, 189.
determination by EDTA method, 69.
effect on clover yield, 1.
Fertilizers:
effects of:
on oat yield, 78.
on potato yield, 81.
percentage method of evaluating, 75, 253.
Flax, effect on incidence of nutritional soil bacteria, 148.
Flood-fallowing, for eradication of *Fusarium oxysporum* f. *cubense*, 397.
"Flotal," compared with other soil conditioners, 463.
Forage, native South Carolina coastal plain, nutrient elements in, 211.
Fungus, effect of oxygen on the survival of, 397.
Fusarium oxysporum f. *cubense*, effect of oxygen on the survival of, 397.
Fusarium oxysporum f. *lycopersici*, effect of oxygen on the survival of, 397.
Galvanometer deflection, and cation uptake by tomato plants, 376.
Glauconite. *See* Greensand.
Gliotoxin, production and extraction from soils, 295.
"Good-Rite K-706," compared with other soil conditioners, 463.
Greensand:
NH_4^+-fixing capacity, 433.
release of potassium from, 199.
Halloysite, fixation and release of NH_4^+ by, 431.
HEEDTA, as a chelating agent, 101.
Hydrogen-ion concentration:
Arctic brown soils, 270.
Leon fine sand profile, 305.
East Pakistan soils, 229.
Hydrolyzates, soil, amino acids in, 181.
Hydroxyethylethylenediaminetriacetic acid. *See* HEEDTA.
Illite:
adsorption of ethane, nitrogen, or water, 424, 428.
ethylene glycol retention, 428.
fixation and release of NH_4^+ by, 431.
in So. African desert soils, 479.
surface density of charge, 427.
Iron:
chelates as nutrient sources, 105.
chlorosis, correction in plants, 101.
fixation in soils, 104.
in South Carolina coastal plain, 211, 224, 226.
stability in nutrient solutions, 103.
Kaolin:
surface density of charge, 427.
water and nitrogen adsorption, 424.
Kaolinite:
adsorption by, 424, 425, 428.
ethylene glycol retention, 428.
identification from thermal curves, 339.
surface density of charge, 427.

"Krilium," compared to other soil conditioners, 463.
Loam, sandy, effect of dryland cropping on phosphorus of, 127.
Lateritic soils:
  effects of liming, 469.
  in North Carolina Piedmont region, 27.
Liming, effects on lateritic soils, 469.
Magnesium:
  effect on barley seedlings, 235.
  specificity of voltage potentials in uptake by tomato plants, 319.
Manganese, in South Carolina coastal plain, 211, 224, 226.
Metabentonites, fixation and release of NH_4^+ by, 431.
Microcline, release of potassium from, 189.
Micronutrients. *See* Trace elements.
Microorganisms, soil, effects of:
  plant decomposition on nutritional groups of, 147.
  release of potassium from mineral forms, 189.
  some physical properties and nutrient-element concentrations on distribution of in soil profile, 303.
Millet, distribution of some elements within plants grown in nutrient solutions, 288.
Minerals, soil:
  and nitrification, 43.
  electron micrographs of, 118.
  fixation and release of ammonium ions by, 431.
  in marine terrace soils, 221.
  in North Carolina lateritic soils, 31.
  in So. African desert regions, 479.
  products of decomposition as related to phosphate fixation, 109.
  reactions and exchange capacity of, 113.
  release of potassium from, 189.
  solubility of, 112.
  use of piperidine in identification by thermal analysis, 337.
  weight loss at various temperatures, 114.
Mitscherlich-Baule equations, validity of, 253.
Moisture, soil:
  a new interpretation of the problem of, 261.
  effect on clover yield, 1.
  evaporation rates, 61.
  moisture equivalent defined and wilting percentage calculated from, 443.
  portable capacitance meter, 391.
  thermodynamic treatment of, 257.
Molybdenum, in Finnish soils, 70.
Montmorillonite:
  adsorption by, 425.
  fixation and release of NH_4^+ by, 431.
  identification from thermal curves, 337.
  in So. African desert soils, 479.
  surface density of charge, 427.
Moore and Stein method, in estimating acids in soil hydrolyzates, 181.
Muck, adsorption of ammonia by, 11.
Muscovite, release of potassium from, 189.
Nitrate ions, influence of light on interaction with ammonium ions, 121.
Nitrate nitrogen, in Leon fine sand profile, 305.
Nitrification:
  effects of low temperatures, 313.
  role of soil surface phenomena, 43.
  studies with montmorillonites, 431.
Nitrogen:
  comparison of surface areas from adsorption of, 423.
  effect of sunlight on losses from soil, 125.
Nontronite, identification from thermal curves, 339.
Nutrient solutions, plant:
  comparison of 5 chelating agents, 101.
  distribution of some elements in plants grown in, 287.
  Fe stability in, 103.
Nutrients, plant:
  in Finnish soils, 70.
  in marine terrace soils, 221.
Oats:
  distribution of some elements within plants grown in nutrient solutions, 288.
  effect on:
    incidence of nutritional soil bacteria, 148.
    yield of phosphate applications, 78.
Obituary, Charles E. Millar, 255.
Oil, mineral, effect on fungus survival, 467.
Organic matter:
  effect on fungus survival, 407.
  in Arctic brown soils, 271.
  influence on soil structure and erodibility, 413.
  relation of soil aggregation to, 451.
Osmometer, dynamic, description of, 97.
Osmotic pressure, effect on diffusion rate of water, 95.
Oxygen, effect on fungus survival, 397.
Pasture productivity, volcanic ash soil and, 1.

Peptone, effect on fungus survival, 407.
Percentage method, for evaluating fertilizer tests, 75, 253.
Phosphates:
  effect on oat yield, 78.
  fixation, products of mineral decomposition as related to, 109.
Phosphorus—*See also* Phosphates:
  and soil reaction, 381.
  content of clover plants, 6.
  effect of long-time dryland cropping, 127.
  in East Pakistan soils, 229.
  in Finnish soils, 72.
  in Leon fine sand profile, 305.
  in South Carolina coastal plain, 211, 224, 226.
  methods of assessing soil availability of, 135.
  relation to other soil properties, 135.
  solubility of soil phosphorus, 383.
Piperidine, use in identification of clay minerals by thermal analysis, 337.
Plants:
  effect of:
    adsorbed ions, 235.
    cropping, 132.
    decomposition, 147.
  supplying iron to, 105.
  voltage potentials and cation uptake, 319.
Podzolic soils:
  lateritic soils compared with, 27.
  titania content of, 277.
Porosity, soil aggregates, relation to water stability, 449.
Potassium:
  distribution in:
    corn plants grown in the field, 309.
    plants grown in nutrient solutions, 287.
  effect on cotton plant characteristics, 282.
  evaluating supply in soils, 309.
  in Leon fine sand profile, 305.
  release from minerals, 189.
  specificity of voltage potentials in uptake by tomato plants, 319.
Potatoes, effect of fertilizer on yield, 81.
Puddling, effect on water stability and bulk density of aggregates, 363.
Root-knot nematodes, influence of soil texture on infestation of, 459.
Roots, effect of:
  aeration on cotton plant growth, 281.
  uptake of adsorbed cations by excised barley roots, 91.
Rubidium, distribution in:
  corn plants grown in the field, 309.
  plants grown in nutrient solutions, 287.
Salinity, soil:
  effect on wilting percentage, 443.
  equipment for appraisal of, 55.
Sand, erodibility by wind, 155.
Sandy loam. *See* Loam.
Sesbania plants, and root-knot infestation, 460.
Silt, erodibility by wind, 155.
Sodium:
  effect on:
    barley seedlings, 235.
    cotton plant characteristics, 281.
  in Leon fine sand profile, 305.
  specificity of voltage potentials in uptake by tomato plants, 319.
Soil conditioners, comparison of, 463. *See also* VAMA.
